## 1. General Descriptions

### 1.1 Introduction

The M190MWW4 is a Color Active Matrix Thin Film Transistor (TFT) Liquid Crystal Display (LCD) module, which uses amorphous Silicon TFT as a switching device. It is composed of a TFT LCD panel, a timing controller, voltage reference, common voltage, column driver, and row driver circuit. This TFT LCD has a 18.95 inch (diagonally measured) active display area with resolution (1,440 vertical by 900 horizontal pixel array).

### 1.2 Features

- 19" TFT LCD Panel
- LED Backlight System
- Supports (V:1,440 lines, H:900 pixels) Resolution
- Compatible with RoHS Standard

### 1.3 Product Summary

(3)  $P_{LED}$  is calculation value for reference.  $P_{LED} = 52 \times V_F$  (Normal Distribution)  $\times I_F$  (Normal Distribution)

(4) The lifetime of LED is defined as the time when LED packages continue to operate under the conditions at  $T_a = 25^\circ\text{C}$  and  $I_F = 60\text{mA}$  (per chip) until the brightness becomes  $\leq 50\%$  of its original value.

(5) All values are measured at condition of  $I_F = 60\text{mA}$  and  $T_a = 25^\circ\text{C}$ .

### 3.3 LVDS Receiver

#### 3.3.1 Signal Electrical Characteristics For LVDS Receiver

The built-in LVDS receiver is compatible with (ANSI/TIA/TIA-644 ) standard.

**Table 6 LVDS Receiver Electrical Characteristics**

Parameter	Symbol	Min.	Typ.	Max.	Unit	Conditions
Differential Input High Threshold	$V_{th}$	-	-	+100	mV	$V_{cm}=+1.2V$
Differential Input Low Threshold	$V_{tl}$	-100	-	-	mV	$V_{cm}=+1.2V$
Magnitude Differential Input Voltage	$ V_{id} $	100	-	600	mV	
Common Mode Voltage	$V_{cm}$	1.0	1.2	1.4	V	$V_{th} - V_{tl} = 200mV$

Note:

(1)Input signals shall be at low or Hi-Z state when  $V_{DD}$  is off.

(2)All electrical characteristics for LVDS signal are defined and shall be measured at the interface connector of LCD.

(3)All values are measured at condition of  $V_{DD} = 5V$  and  $T_a = 25^\circ C$ .

## 8 General Precaution

### 8.1 Use Restriction

This product is not authorized for use in life supporting systems, aircraft navigation control systems, military systems and any other application where performance failure could be life-threatening or otherwise catastrophic.

### 8.2 Handling Precaution

- 1) Please mount LCD module by using mounting holes arranged in four corners tightly.
- 2) Do not disassemble or modify the module. It may damage sensitive parts inside LCD module, and may cause scratches or dust on the display. IVO does not warrant the module, if customers disassemble or modify the module.
- 3) If LCD panel is broken and liquid crystal spills out, do not ingest or inhale liquid crystal, and do not contact liquid crystal with skin. If liquid crystal contacts mouth or eyes, rinse out with water immediately. If liquid crystal contacts skin or cloths, wash it off immediately with alcohol and Rinse thoroughly with water.
- 4) Disconnect power supply before handling LCD module.
- 5) Refrain from strong mechanical shock and /or any force to the module.
- 6) Do not exceed the absolute maximum rating values, such as the supply voltage variation, input voltage variation, variation in parts' parameters, environmental temperature; etc otherwise LCD module may be damaged. It's recommended employing protection circuit for power supply.
- 7) Do not touch, push or rub the polarizer with anything harder than HB pencil lead. And please do not rub with dust clothes with chemical treatment. Do not touch the surface of polarizer for bare hand or greasy cloth. (Some cosmetics are detrimental to the polarizer.)
- 8) When the surface is dusty, please wipe gently with absorbent cotton or other soft Material. When cleaning the adhesives, please use absorbent cotton wetted with a little petroleum benzene. Normal-hexane is recommended for cleaning the adhesives used to attach front/ rear polarizer. Do not use acetone, toluene and alcohol because they cause chemical damage to the polarizer.
- 9) Wipe off saliva or water drops as soon as possible. Their long time contact with polarizer causes deformations and color fading.
- 10) Protection film must be removed very slowly from the surface of LCD module to prevent from electrostatic occurrence.
- 11) Because LCD module uses CMOS-IC on circuit board and TFT-LCD panel, it is very weak to electrostatic discharge, Please be careful with electrostatic discharge .Persons who handle the module should be grounded through adequate methods.

Document Title	M190MWW4 R2 Product information			Page No.	24/24
Document No.		Issue date	2012/03/28	Revision	V00

12) Do not adjust the variable resistor located on the module.

### 8.3 Storage Precaution

- 1) Please do not leave LCD module in the environment of high humidity and high temperature for a long time.
- 2) The module shall not be exposed under strong light such as direct sunlight. Otherwise, Display characteristics may be changed.
- 3) The module should be stored in a dark place. It is prohibited to apply sunlight or fluorescent light in storage.

### 8.4 Operation Precaution

- 1) Do not connect or disconnect the module in the "Power On" condition.
- 2) Power supply should always be turned on/off by "Power on/off sequence".
- 3) Module has high frequency circuits. Sufficient suppression to the electromagnetic interference should be done by system manufacturers. Grounding and shielding methods may be important to minimize the interference.
- 4) After installation of the TFT Module into an enclosure, do not twist nor bend the TFT Module even momentary. At designing the enclosure, it should be taken into consideration that no bending/twisting forces are applied to the TFT Module from outside. Otherwise the TFT Module may be damaged.

### 8.5 Others

- 1) Ultra-violet ray filter is necessary for outdoor operation.
- 2) Avoid condensation of water which may result in improper operation or disconnection of electrode.
- 3) If the module keeps displaying the same pattern for a long period of time, the image may be "Sticked" to the screen.
- 4) This module has its circuitry PCB on the rear side and should be handled carefully in order not to be stressed.

### 8.6 Disposal

When disposing LCD module, obey the local environmental regulations.
